

BGPERT

Bath GP Education & Research Trust

There is no planet B: How can GPs & PNs keep our world healthy?

With Drs Rebecca Hall, Alice Gardner, & Alan Kellas

These 3 clinicians are passionate advocates for linking our clinical practice to the (natural) world outside our consulting rooms

Wednesday 14th October 2020 – 2.00pm

BGPERT Webinar via Zoom

Please RSVP to [BGPERT](#)

Learning Objectives:

- Understand where the carbon hotspots of the NHS are
- Cover what 3 things you can do tomorrow to make your clinical practice more sustainable
- Understand the basics of the challenges presented by the climate and ecological crisis, including threats to - and opportunities for improving - public health.
- Reflect on how health professionals can take action on climate change and understand that we are a valuable and powerful voice.
- Think about how our well-being links with the well-being of the natural world
- How can I use nature connections in my everyday practice?

Please see Dr Gardner's [video on YouTube](#). It's aimed at schools and parents, but is an example of doctors talking about climate action, and is relevant to many GPs who are parents.

Schools Climate Network is a local group aiming to encourage all schools to declare a climate emergency and start putting the climate and ecological emergency at the centre of everything they do.
